## corregir error bind shared en laravel

[Symfony\Component\Debug\Exception\FatalErrorException] Call to undefined method Illuminate\Foundation\Application::bindShared()

bindShared() have been replaced with singleton()

It is located here: /path-to-your-project/vendor/illuminate/html/HtmlServiceProvider.php

change on line no : 36 and 49

## Instalar Node.js

Para poder utilizar gulp se require Node

- npm install
- \$ npm install --global gulp-cli
- \$ npm install --save-dev gulp
- \$ gulp
